# Occupational Injuries by Accident Type and Occupation in British Columbia, 1998-2002

The Occupational Injuries by Accident Type and Occupation tables provide statistical information on occupational injuries in British Columbia for the years 1998 to 2002. Injuries are categorized by the type of accident that led to the injury and by the occupation of the injured person.

Injuries included in the report were accepted for short term disability benefits, long term disability benefits, or survivor benefits either in the year of injury or in the following year. The tables include claim counts by gender and statistics on average age, injury year duration, and rate of injury.

Occupational Injuries by Accident Type and Occupation in British Columbia, 1998-2002 tables provide statistical information on occupational injuries occurring in 1998, 1999, 2000, 2001 or 2002.

Table of Contents for Occupational Injuries by Accident Type and Occupation in British Columbia, 1998-2002

## About the 1998-2002 tables

- The injuries included for year of injury 2002 are those accepted in 2002 or in the first five months of 2003. This means that the counts for 2002 are on the same basis as the counts for the other years for all practical purposes.

- The term 'short term disability' (STD) has replaced 'wage loss', and 'long term disability' (LTD) has replaced 'permanent disability'. Claims uncoded to accident type or occupation have been proportionately allocated to the accident type and occupation categories.

- Note that claims can be counted in different ways, when comparing the claim counts in this report to claim counts in other WCB reports. For example, in the statistical supplement to the 2002 Annual Report, Statistics 2002, claims are counted by the year in which the first benefit was awarded, rather than by year of injury.

- The injury rate calculation in Tables 1 and 1A is approximate. The estimates of person years are calculated by combining information on total employment by occupation from the Statistics Canada Labour Force Survey with estimates of WCB covered person years of employment.

- Tables 9A-9F provide claim counts at the most detailed levels of

occupation and type of accident. Data is shown for the occupations with 100 or more short term disability injuries over the 1998-2002 period. Comparable information for other occupations is available on request from the Statistical Services department of the Workers' Compensation Board:

- The coding on which this report is based is done by the Statistical Services Department of the Workers' Compensation Board. The code standards used for type of accident and for occupation are part of the CWIS coding standard used by all the compensation boards in Canada. The code standard for the type of accident is CSAZ795 and the code standard for occupation is the 1991 SOC (Standard Occupational Classification).

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The injury year duration statistic is days lost per claim in the year of injury for injury years 1998 through 2002.

(3) Duration results are not shown where there are 25 or fewer claims.

(4) Uncoded claims have been proportionately allocated. The allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(5) The unit for the injury rate is 'number of claims per 100 estimated personyears where the claims are those where std, ltd, or survivor benefits were awarded in the year of injury or in the first quarter of the following year. The personyears for the purpose of the injury rate have been estimated by combining statistics canada employment data with wcb estimates of personyears.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The unit for the injury rate is 'number of claims per 100 estimated personyears where the claims are those where std, ltd, or survivor benefits were awarded in the year of injury or in the first quarter of the following year. The personyears for the purpose of the injury rate have been estimated by combining statistics canada employment data with wcb estimates of personyears.

(3) The approximation introduced by the method of estimating personyears, and by the fact that the occupational classification of the claims has been done by the wcb whereas the occupational classification underlying the personyears has been done by Statistics Canada, means that the absolute levels of the injury rates may have some error. The trend in the injury rates will not be affected by these factors.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The injury year duration statistic is work days lost per claim in the year of injury for injury years 1998 through 2002.

(3) Duration results are not shown where there are 25 or fewer claims.

(4) Uncoded claims have been proportionately allocated. The allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) Uncoded claims have been proportionately allocated, the allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The injury year duration statistic is work days lost per claim in the year of injury for injury years 1998 through 2002.

(3) Duration results are not shown where there are 25 or fewer claims with days lost in the year of injury.

(4) Uncoded claims have been proportionately allocated, the allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.
(2) The injury year duration statistic is work days lost per claim in the year of injury for injury years 1998 through 2002.
(3) Duration results are not shown where there are 25 or fewer claims.
(4) Uncoded claims have been proportionately allocated. the allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) Uncoded claims have been proportionately allocated. the allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The selected 1991 soc categories are those with a total of 100 or more std claims in the 1998-2002 period.

(3) Uncoded claims have been proportionately allocated. the allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

| | Total | 142 | 126 | 139 | 118 | 92 | 617 |

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.
(2) The selected 1991 soc categories are those with a total of 100 or more std claims in the 1998-2002 period.
(3) Uncoded claims have been proportionately allocated. The allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The selected 1991 SOC categories are those with a total of 100 or more std claims in the 1998-2002 period.

(3) Uncoded claims have been proportionately allocated. The allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The selected 1991 SOC categories are those with a total of 100 or more std claims in the 1998-2002 period.

(3) Uncoded claims have been proportionately allocated, the allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The selected 1991 SOC categories are those with a total of 100 or more std claims in the 1998-2002 period.

(3) Uncoded claims have been proportionately allocated. The allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.

(1) The claim counts are by year of injury, and include all claims for injury years 1998 through 2002 that were accepted for std, ltd, or survivor benefits either in the year of injury or in the following year (until May 31, 2003 for 2002 injuries). Health-care-only claims are not included.

(2) The selected 1991 SOC categories are those with a total of 100 or more std claims in the 1998-2002 period.

(3) Uncoded claims have been proportionately allocated. The allocated counts have been rounded to whole numbers. Column and row totals have been rounded independently, so the columns and rows may not add up exactly to the totals shown.
